

# ORBITA

TRAY & BOWL  
BY NEISAKO

Wooden board features a profiled edge surface that gradually changes angle every 90 degrees. On opposite sides, these tilted edges have a sufficient angle for handling. In that way, "handles" are hidden in the form. Horizontal symmetry allowed formation of an object with a double function. On one side concave shape can be used as a fruit-bowl while on the other flat indented surface is meant to be used as a serving tray.

**PRODUCT TYPE**

Tray & bowl

**DIMENSIONS**

Width 41 cm

Height 4 cm

Depth 41 cm

**MATERIALS**

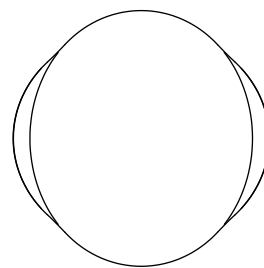

Solid wood - Oak, Ash, Walnut

**WEIGHT**

2 kg

**PACKAGE**

45 x 45 x 5 cm
