

## A LINE SHOE RACK

Mounting guide\*

### STEP 1

Place the shoe rack against a wall. When the shoe rack has been placed where it should be, make a small mark with a pencil in the center of the top.

### STEP 2

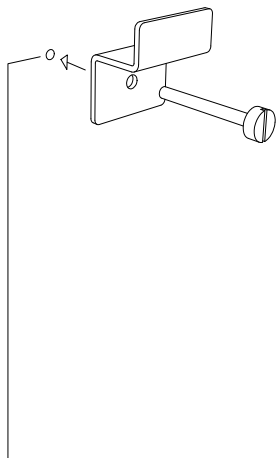

Remove the shoe rack from its position. Measure 96,8 cm from the floor to the small mark (the centre of the shoe rack top).

*\*Note: The shoe rack can be used without mounting the metal bracket. However we recommend fixing the shoe rack on the wall with the bracket, especially if kids and pets live in the home.*

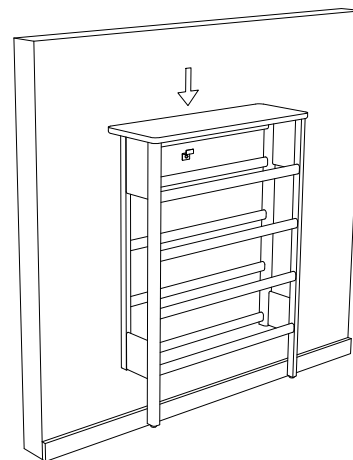

## A LINE SHOE RACK

Mounting Instructions\*

### STEP 3

Mount the bracket on the wall. Drill a hole and use a raw plug if necessary, depending on what type of wall it is.

### STEP 4

Place the shoe rack against the wall and attach it to the metal bracket.

*\*The shoe Rack can be used without mounting the metal bracket. However we recommend fixing the Shoe rack on to wall with the bracket especially if kids and pets are living in the home.*
