

# Sinuate Pendant

Sinuate Pendant is a layered paper light that takes shape through tension alone - no glue, no fastenings.

It is made from two sheets of Japanese paper, each cut with small connection holes that slide onto a star-shaped fitting in stainless steel or brass. Once pressed into place, the paper bends into its curved form, creating a soft sculptural silhouette. The inner layer directs the downlight, while the outer diffuses it gently across the surface, giving the lamp its warmth and even glow.

Available in two sizes, Sinuate Pendant is delivered pre-assembled and ready to hang.

#### Dimensions

Large: 75 x 75 x 40 cm (L x W x H)

Medium: 60 x 60 x 30 cm (L x W x H)

#### Colour
